Pending includes authoring Draft/Ready for Review and approvals without a verified current reviewed version. Authoring state is retained separately.

Current requirements with at least one active current-content-version case explicitly linked to an existing acceptance criterion. A link does not prove complete test coverage.

All current criteria have explicit links to current active cases. This measures recorded links, not semantic completeness or execution success.

One latest execution per active current-content-version case, for its exact current case revision. No record means Not Run. Only Pass counts as passed; Blocked and Not Run never do.

All non-Closed bugs in the project, including historical requirement versions, grouped by severity. Ready for Retest is still open.

Distinct current requirements with non-current approval, missing/stale analysis, missing/review-required criteria, uncovered/invalid criterion links, or missing/stale/unapproved/clarification-needed cases. Category counts can overlap.

REQ-1 - Versioned traceability and Manual execution

Project current | Current content version 3 | Customer ticket

SQA review: Pending | Authoring state: Draft | Reviewed version: not verified

Recorded criterion links do not prove complete coverage. Only Pass is passed; Not Run and Blocked are not passed. Historical cases/results do not validate a new requirement version.

Requirement version 3 (current)

Recorded 2026-10-20T19:32:46.456Z | Actor 2 | saved version

Customers can view the subject and description of tickets they own.

AC-001: An owner sees the requested owned ticket.

Requirement version 2 (historical)

Recorded 2026-10-20T19:32:46.079Z | Actor 2 | saved version

Customers can view tickets they own.

AC-001: An owner sees the requested owned ticket.

Requirement version 1 (historical)

Recorded 2026-10-20T19:32:46.035Z | Actor 2 | saved version

Customers can view tickets they own.

TC-1: Open an owned ticket

Requirement version 2 | Case revision 1 | Draft | active | Functional | Priority High

Criterion links: AC-001

Preconditions: Customer owns ticket A.

Test data: Synthetic ticket A

1. Request owned ticket A.

Expected: Owned ticket A is shown.

Clarification: None recorded
