Project Quality Summary

ReqQuality AI | Generated 2026-10-30 04:52 UTC

Project Overview

Total Requirements	1
Average Quality Risk Score	0/100
Total Test Scenarios	3
All criteria explicitly linked	100.0% (1 requirements); recorded links, not proof of complete coverage

Review Status Distribution

Pending	0
In Review	0
Approved	1
Needs Revision	0

Risk Distribution

Low	0
Medium	1
High	0
Critical	0
Unscored	0

Requirement Type Distribution

Functional	1
Non-Functional	0
Business	0

High Attention Requirements

No high-attention requirements.

Current-version metrics and definitions

review_status_counts: {'Pending': 0, 'In Review': 0, 'Approved': 1, 'Needs Revision': 0}

requirements_with_linked_cases: 1

requirements_without_linked_cases: 0

latest_execution_counts: {'Not Run': 3, 'Pass': 0, 'Fail': 0, 'Blocked': 0}

open_bugs_by_severity: {'Critical': 0, 'High': 0, 'Medium': 0, 'Low': 0}

items_needing_review_count: 0

Pending includes authoring Draft/Ready for Review and approvals without a verified current reviewed version. Authoring state is retained separately.

Current requirements with at least one active current-content-version case explicitly linked to an existing acceptance criterion. A link does not prove complete test coverage.

All current criteria have explicit links to current active cases. This measures recorded links, not semantic completeness or execution success.

One latest execution per active current-content-version case, for its exact current case revision. No record means Not Run. Only Pass counts as passed; Blocked and Not Run never do.

All non-Closed bugs in the project, including historical requirement versions, grouped by severity. Ready for Retest is still open.

Distinct current requirements with non-current approval, missing/stale analysis, missing/review-required criteria, uncovered/invalid criterion links, or missing/stale/unapproved/clarification-needed cases. Category counts can overlap.

REQ-1 - Versioned traceability and Manual execution

Project current | Current content version 2 | [FYP DEMO] Valid sign-in

SQA review: Approved | Authoring state: Approved | Reviewed version: 2

Saved requirement: A registered active user signs in with their valid email and password. Successful sign-in opens the user dashboard. Both fields are required; empty email or password is rejected without opening the dashboard.

Saved analysis: AI suggestions requiring review

Proposed refinement: A registered active user signs in with their valid email and password [TO BE CONFIRMED: specify valid email format and password rules]. Successful sign-in opens the user dashboard. Both fields are required; empty email or password is rejected without opening the dashboard [TO BE CONFIRMED: specify error feedback].

Clarification: What specific criteria define a valid email and password for a registered active user?

Clarification: What exact feedback or error indication must be presented to the user when an empty email or password is submitted?

Missing information: Definition of valid email format and password rules.

Missing information: Specific error handling behavior or messaging when empty email or password is provided.

Risk explanation: Ambiguity in credential validation rules and error feedback introduces uncertainty in implementation and testing, which could lead to inconsistent user experience or security gaps if not clarified.

Priority explanation: The priority is marked as High based on the input data, but no business rationale was supplied; this needs stakeholder confirmation.

Suggested risk: Medium | Suggested priority: High

AC-001: A registered active user provides a valid email and password, resulting in a successful sign-in and opening of the user dashboard. | Needs review

AC-002: An empty email field results in rejection of the sign-in attempt without opening the dashboard. | Needs review

AC-003: An empty password field results in rejection of the sign-in attempt without opening the dashboard. | Needs review

Recorded criterion links do not prove complete coverage. Only Pass is passed; Not Run and Blocked are not passed. Historical cases/results do not validate a new requirement version.

Requirement version 2 (current)

Recorded 2026-10-30T04:52:21.033Z | Actor 2 | saved version

A registered active user signs in with their valid email and password. Successful sign-in opens the user dashboard. Both fields are required; empty email or password is rejected without opening the dashboard.

AC-001: A registered active user provides a valid email and password, resulting in a successful sign-in and opening of the user dashboard.

AC-002: An empty email field results in rejection of the sign-in attempt without opening the dashboard.

AC-003: An empty password field results in rejection of the sign-in attempt without opening the dashboard.

Requirement version 1 (historical)

Recorded 2026-10-30T04:52:12.053Z | Actor 2 | saved version

A registered active user signs in with their valid email and password. Successful sign-in opens the user dashboard. Both fields are required; empty email or password is rejected without opening the dashboard.

TC-1: Verify valid sign-in

Requirement version 2 | Case revision 4 | Approved | active | Unspecified | Priority High

Criterion links: AC-001

Preconditions: User is registered and active; User has a valid email and password

Test data:

1. Enter valid email

2. Enter valid password

3. Request sign-in

Expected: Sign-in succeeds and the user dashboard opens.

Clarification: None recorded

TC-2: Sign-in rejected with empty email

Requirement version 2 | Case revision 3 | Approved | active | Unspecified | Priority High

Criterion links: AC-002

Preconditions: User is on the sign-in interface

Test data:

1. Leave email field empty

2. Enter valid password

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Clarification: None recorded

TC-3: Sign-in rejected with empty password

Requirement version 2 | Case revision 3 | Approved | active | Unspecified | Priority High

Criterion links: AC-003

Preconditions: User is on the sign-in interface

Test data:

1. Enter valid email

2. Leave password field empty

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Clarification: None recorded

Case snapshot #1 - TC-1 revision 1

Requirement version 2 | Successful sign-in with valid credentials | Criteria: AC-001

Preconditions: User is registered and active; User has a valid email and password | Test data:

1. Enter valid email

2. Enter valid password

3. Request sign-in

Expected: Sign-in succeeds and the user dashboard opens.

Case snapshot #2 - TC-2 revision 1

Requirement version 2 | Sign-in rejected with empty email | Criteria: AC-002

Preconditions: User is on the sign-in interface | Test data:

1. Leave email field empty

2. Enter valid password

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Case snapshot #3 - TC-3 revision 1

Requirement version 2 | Sign-in rejected with empty password | Criteria: AC-003

Preconditions: User is on the sign-in interface | Test data:

1. Enter valid email
2. Leave password field empty
3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Case snapshot #4 - TC-1 revision 2

Requirement version 2 | Verify valid sign-in | Criteria: AC-001

Preconditions: User is registered and active; User has a valid email and password | Test data:

1. Enter valid email
2. Enter valid password
3. Request sign-in

Expected: Sign-in succeeds and the user dashboard opens.

Case snapshot #5 - TC-1 revision 3

Requirement version 2 | Verify valid sign-in | Criteria: AC-001

Preconditions: User is registered and active; User has a valid email and password | Test data:

1. Enter valid email
2. Enter valid password
3. Request sign-in

Expected: Sign-in succeeds and the user dashboard opens.

Case snapshot #6 - TC-1 revision 4

Requirement version 2 | Verify valid sign-in | Criteria: AC-001

Preconditions: User is registered and active; User has a valid email and password | Test data:

1. Enter valid email
2. Enter valid password
3. Request sign-in

Expected: Sign-in succeeds and the user dashboard opens.

Case snapshot #7 - TC-2 revision 2

Requirement version 2 | Sign-in rejected with empty email | Criteria: AC-002

Preconditions: User is on the sign-in interface | Test data:

1. Leave email field empty
2. Enter valid password
3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Case snapshot #8 - TC-2 revision 3

Requirement version 2 | Sign-in rejected with empty email | Criteria: AC-002

Preconditions: User is on the sign-in interface | Test data:

1. Leave email field empty

2. Enter valid password

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Case snapshot #9 - TC-3 revision 2

Requirement version 2 | Sign-in rejected with empty password | Criteria: AC-003

Preconditions: User is on the sign-in interface | Test data:

1. Enter valid email

2. Leave password field empty

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Case snapshot #10 - TC-3 revision 3

Requirement version 2 | Sign-in rejected with empty password | Criteria: AC-003

Preconditions: User is on the sign-in interface | Test data:

1. Enter valid email

2. Leave password field empty

3. Request sign-in

Expected: Sign-in is rejected and the user dashboard does not open.

Version-bound SQA review history

Review #1 | Requirement version 2 | In Review | Engineer (User 3) | 2026-10-30T04:52:23.625Z | Synthetic local rehearsal review, not supervisor or production approval. | Evidence: {'requirement_revision': 10, 'case_version_ids': [1, 4, 5, 6, 2, 7, 8, 3, 9, 10], 'execution_ids': [], 'bug_ids': []}

Review #2 | Requirement version 2 | Approved | Engineer (User 3) | 2026-10-30T04:52:23.674Z | Synthetic local rehearsal review, not supervisor or production approval. | Evidence: {'requirement_revision': 11, 'case_version_ids': [1, 4, 5, 6, 2, 7, 8, 3, 9, 10], 'execution_ids': [], 'bug_ids': []}
